DETAILED ACTION

Drawings

1. The drawings filed November 3, 1998 are informal. The drawings are also blurred and the boxes in Figure 1 should be labeled.
2. Formal drawings **are required** responsive to this Office action. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Priority

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Great Britain on November 3, 1997. It is noted, however, that applicant has not filed a certified copy of the British application as required by 35 U.S.C. 119(b).

Specification

4. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because the lines are blurred and some of the text is illegible which could lead to confusion and mistake during the issue and printing processes. Accordingly, the portion of the specification or claims as identified below is required to be rewritten before passing the case to issue. See 37 CFR 1.125 and MPEP § 608.01(q).

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

Allowable Subject Matter

5. Claims 1-5 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various pulse generating systems.
